**WEATHERSFIELD TOWNSHIP SELECTS CBOSS
FOR WEBSITE REDESIGN**

<u>For Immediate Release</u>

MINERAL RIDGE, Ohio – The Weathersfield Township Board of Trustees has selected Valley software company CBOSS to redesign the township's website to make it more friendly and accessible to users.

CBOSS, which has been providing web services and software to business and government customers for over 10 years, will provide the township with the CBOSS Content Management System (CCMS), a cost-effective web portal solution that will provide a fresh new look and feel to the website and provide the ability for township staff to make changes and update content on the site easily and quickly.

"We're very pleased to have found a solution like the one CBOSS provides to redesign our website at an affordable price, and which will allow us to continually update the site to make it very informative and useful for the residents and the businesses we serve," said Weathersfield Township Administrator David Pugh.

"With a solution like the CCMS, our customers can quite cost-effectively have their site completely redesigned and then, after a brief training period, can easily update their site as often as they wish – with text and graphics," said Jenny Hammond, Director of Operations. "No knowledge of website programming is necessary."

-more-

Weathersfield Township purchased the basic system of the CCMS which is comprised of a set of standard modules. Additional premium modules can be included depending on customers' requirements.

The CCMS is designed to make it easy for users to manage all aspects of their projects. Site wizards, help icons, and a well-researched friendly user interface allow universal ease-of-operation.

The CCMS comes loaded with a set of built-in tools that provide powerful functionality. Site design, content, security, and membership options are easily managed and customized through these tools.

With CCMS, no software or program installations are required. CCMS can be used from any Internet connected PC from home, office or on the go.

About CBOSS

From enterprise software solutions to managed services, CBOSS specializes in the design and implementation of portal solutions for e-payment processing, workflow automation and content management using industry-standard platforms and tools. Since 1994, over 700 businesses and government agencies have looked to CBOSS to deliver feature-rich services and solutions that are cost-effective, reliable and secure. CBOSS is compliant with the Payment Card Industry (PCI) Data Security Standard, which provides the highest levels of security for e-commerce and other e-payment processing services.
